

2019 Construction Projects

Alabama Street Sanitary Sewer Improvements

Project Manager: Gustavo Silva, Associate Engineer, 707-652-7809

Description: Rehabilitation of approximately 1,300 linear feet of sanitary sewer mains and laterals in easements of the 1300 blocks of Alabama and Tennessee Streets between Halliday and Amador Streets. The project will replace deteriorated sewer mains installed in the 1950s that, due to structural defects and root intrusion, are subject to sanitary sewer overflows and require increased maintenance.

Schedule: June through September of 2019

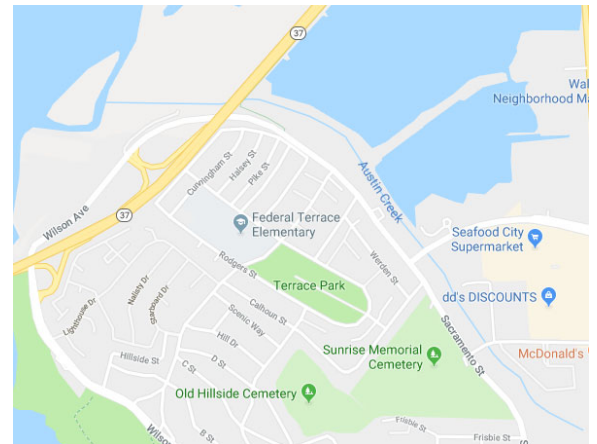

Austin Creek Sediment Removal Project

Project Manager: Natalie Muradian, Associate Engineer, 707-558-3416

Description: Removal of accumulated vegetation and sediment in Austin Creek between Sonoma Boulevard and Highway 37 to restore flood conveyance capacity.

Schedule: July through mid-October of 2019

Mare Island Way Sewer Rehabilitation Project

Project Manager: Natalie Muradian, Associate Engineer, 707-558-3416

Description: Replacement and rehabilitation of approximately 800 feet of 36-inch diameter sanitary sewer main in Mare Island Way between National Alley and Florida Street. The project will repair severely deteriorated sewer mains constructed in the 1950s.

Schedule: July through September of 2019

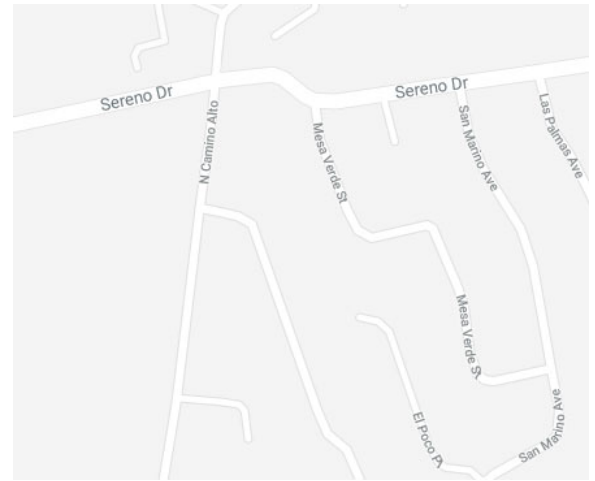

Sereno/Mesa Verde Sewer Rehabilitation Project

Project Manager: Kyle Broughton, Engineering Supervisor,

707-651-7139

Description: Rehabilitation of approximately 2,400 linear feet of sanitary sewer mains in the 300 block of Mesa Verde Street continuing west on Sereno Drive in the vicinity of the Kaiser Permanente Vallejo Medical Center to Broadway Street. The project will replace aging pipelines that allow stormwater and groundwater to infiltrate into the sewer system. Reducing this infiltration helps decrease the possibility of sewer overflows and spills. The areas with high infiltration where work will take place were identified through inspections of pipeline conditions regularly conducted by Vallejo Wastewater. Vallejo Wastewater will complete this work in advance of a City of Vallejo paving and resurfacing project on Sereno Drive scheduled for July 2019. Access to the Kaiser Permanente Vallejo Medical Center will be accommodated at all times during construction.

Schedule: May through mid-July of 2019

Skibbereen Monteith Storm Drain Improvements

Project Manager: Gustavo Silva, Associate Engineer, 707-652-7809

Description: Construction of 800 linear feet of new 36-inch diameter storm drain to address localized flooding issues in the vicinity of Skibbereen Lane and Monteith Drive. The new storm drain lines will collect storm water flow from the project area and convey it to the existing storm drain system at Fleming Avenue, relieving existing capacity deficient piping.

Schedule: July through September of 2019
